DETAILED ACTION

1. This action is in response the amendment filed on 04/30/07.

Allowable Subject Matter

2. Claims 1, 3 – 26 and 29 are allowed.
3. The following is an examiner's statement of reasons for allowance: The art of record does not teach nor does it suggest the specific features called for in the claims, in particular the concept of computing attenuation coefficients along lines perpendicular to the cranio-caudal axis of the heart to compute the movement of vessels in the heart region in order to determine the cardiac cycle. Argiro (7,031,504) is the only reference the examiner could find that teaches the general concept of the invention, mainly tracking blood vessels in the heart to determine the cardiac cycle. Argiro, however, tracks the blood vessels in a different manner than the applicants teach, there would be no reason to switch to the applicant's approach in Argiro.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. US 20070036417 A1 is a continuation of US Pat. 7,031,504, which is the most relevant piece of prior art found.
